Product data sheet

Selection item

Article number: ILB0006 - PU 1

Which version it will ultimately be is entirely up to you!

Thanks to the simple selection option, it's easy to display items in various versions in the shop frontend. These selection options can be managed and customized in the backend.

Additionally, different prices are defined for each version. This is indicated by the from price prefix.

Product data sheet

Proof-of-Purchase Item

Article number: ILB0019 - PU 1

Why Proof-of-Purchase?

Gifts are subject to tax obligations above a certain amount. This applies to the giver, not the shop operator. However, we offer the collection of recipient data as a service in the shop. This way, all recipients are generated via an Excel spreadsheet and subsequently forwarded to the accounting department, which represents an enormous relief in terms of workload.

Product data sheet

Stock Assessment

Article number: ILB0016 - PU 100

Our intelligent price calculation tool determines the current price based on the quantity preordered.

The more customers preorder, the lower the price will be.

At the end of the inquiry, each customer will receive an email with the final price achieved.

Everyone then has the opportunity to respond to the reduced price and, if necessary, adjust their order quantity.

“Nutritional Information Tables Article”

Article number: ILB0010 - PU 1

You are what you eat!

Providing a nutritional information table for food products is not just a legal requirement; it also informs consumers about the nutritional values of the product in question. It shows the amounts of fat, saturated fatty acids, carbohydrates, sugar, protein, and salt contained in the product.

Sample Orderable Items

Article number: ILB0020 - PU 50

Test Products Before You Buy!

The sample ordering function allows customers to order a small quantity of a product per variant, despite the usual sales unit (VPE). This feature enables customers to test products before purchasing or to acquire a small amount for testing purposes.

Product data sheet

Request Item

Article number: ILB0021 - PU 1

What is the purpose of the product inquiry?

A product inquiry in a shop system is useful to inform customers about special product details or individual price offers. This applies to items that are not in stock. It improves customer service, increases satisfaction, and helps the company better understand product demand and adjust the product range accordingly.
